- J. McEwan

VOL. LXVIII, NO. 44 THE UNIVERSITY OF ALBERTA EDMONTON CANADA_TUESDAY, MARCH 14, 1978. TWENTY PAGES

e declining quality of education

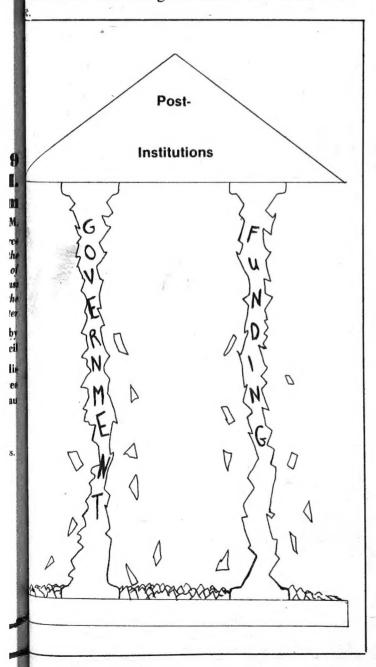

Vhy pay more for less?

In this special issue of the *Gateway*, we have used starting point the government statement that they no quantitative or qualitative evidence that the ent operating grant (which is \$6.2 million short of university's request) is damaging the quality of ation or making it more difficult for Albertans to we an education.

Our research, based on letters from faculty deans he vice-president of the university finance and inistration which outline preliminary budget ests, interviews with department heads, and yses of government and independent studies shows is plenty of specifically detailed evidence which onstrates the negative effects of restrictive governt spending.

Every faculty is being hit by the consequences of shortfall, and we have included a summary of all so that you may see exactly how present rument policy is going to affect your education, the education of your younger brothers and sisters a near future.

The more information we collected, the more out the effects seemed to become. We encourage to seriously consider the contents of this paper with ext to your own education. By the time our research concluded last night, the full impact of words used arious deans to describe the effects, words such as stic," "devastating," "crippling," was evident. The ds no longer seemed to be exaggerations of fact. Once the contents herein are considered, perhaps march to the legislature tomorrow to voice this faction with the government will make more

Cutback Effects

(page 6)

Faculty of Arts

- lower English proficiency priorities
- structural changes contemplated

(page 3)

Faculty of Engineering

- further restrictive quotas
- graduate students refused

(page 8)

Library

- acquisitions cuts causing gaps
- shorter library hours

(page 3)

Faculty of Business Admin. & and Commerce

- reduction in course offerings
- —increased teaching load

(page 5)

Department of Chemistry

- anticipated supplies shortages
- extensive research cutbacks

Editorial

- Gunning will not march
- Who does the Board of Governors represent?

Hohol doesn't have facts straight

by Don McIntosh

The following is based on statements made by the Minister of Advanced Education Dr. Bert Hohol last week during question period in the

The first set of statements to be discussed arose from a question on quotas (Mar. 6 Hansard) for the faculties of agriculture and engineering. The gist of the question was: is the imposition of quotas related to restricted government spending for universities? Dr. Hohol's answer, basically, was no.

This is directly contradictory to statements made by the chairman of the Board of Governors in a letter addressed to Dr. Hohol and dated August 18, 1977. Mr. Geddes statement is backed by several others from the deans of the faculties.

The second set of statements to be discussed were sparked by questions as to whether the government's policy may be adversely affecting the quality of education (Mar. 7 Hansard).

Again, Dr. Hohol says there is no correspondence between the two. And again statements by the Board and the deans contradict this assertion.

Dr. Hohol on Quotas, The prerogative of the Board

With regard to the Mar. 6 question, the first point Dr. Hohol makes is that the government has no business interfering with university autonomy. He argues quotas are the prerogative of the university's Board of Governors and are not related to government funding. He does not reply to comments by Dr. Buck and Mr. Clark (Socreds) when they point out the government usurped university autonomy when the Universities Commission was abolished and placed its former power directly in the hands of the Minister of Advanced Education.

After admitting he had discussed with university officials the possibility that university funding would lead to the imposition of more quotas in faculties that have not previously had quotas, Dr. Hohol says there is no correspondence between funds available today and

To quote him precisely "I'm saying today that there's not a shortage of money in the institutions of the kind that would lead to quotas."

In the Aug. 18 letter to Dr. Hohol, chairman of the Board of Governors Eric Geddes states the following: "... punitive budgeting has adversely affected the academic programs of most, if not all of our faculties ... One of the ways in which the workload problem is being resolved is by the introduction of quotas - with Engineering and Business Administration and Commerce being the most recent Faculties to limit the enrolment of qualified applicants. This trend will almost certainly extend into still more areas unless relief

In letters submitted by the deans to the Board N of Governors this point was reiterated in more detail (see following stories p. 3, 4, and 5) Representative extracts from these letters were included in Mr. Geddes' submission to Dr.

Tuesday's question period: The inflationary dollar

The following day Grant Notley asked Dr. Hohol if he had had an opportunity to evaluate the impact on advanced education at the U of A as a consequence of some of the decisions the Board has had to make.

Dr. Hohol replied that the consequences of the government's funding policy are the responsibility of the Board of Governors.

He said: "That has to do with internal allocation of the resources within the university by the university; (it is) important to note that the increases this year are in addition to a 10 per cent increase on a base which increased by 11 per cent the year before; important to note, too, that the full time equivalent enrolments increased by 9 per cent for the period of 1974-75 to 77-78, but the per student grants during the same period increased by 50 per cent. So the record is there to examine and instead of speaking in general terms, we have to get down to percentages and absolute dollars, as the Hon. Premier pointed out."

There are other ways of considering these statistics, as the government report titled An Examination of Tuition Fee Structures in Alberta

Dr. Hohol says we should talk in terms of absolute dollars and suggests "the record is there to examine." An examination of the above report yields the following information (see p. 40,

Volume I; the report speaks in terms of co dollars — the real value of a dollar once in is subracted):

"... At Universities, expenditure leve declined in terms of constant dollars (dur period 1969-70 to 1975-76)...

"Universities' enrolments have increa rate greater than the level of provincial or per capital expenditure in constant dollar

In other words, although Dr. Hoh operating grants to students have increase per cent, the actual number of dollar inflation has been accounted for, has decl fact, later in the report the decline, meas terms of per capita expenditures for ad education (including tech schools and col well as universities) decreased by 11.48 per constant dollars.

Really, what you can do with statistics...

by Nick Cooke

Premier Lougheed stated on Tuesday, March 7 that "... this province now, and with the proposed increase, is by far the leader in Canada in its per capita support to university and postsecondary education." Although this is true, it does not reflect the real situation in regards to per capita support. Since 1969-70 it has declined.

Comparisons provinces are difficult to make as there are different items included in different budgets. Alberta, for example does not subsidize utility costs while the other provinces do.

Provincial revenues per capita increased by 82.64% between 1969-70 and 1975-76. Expenditures per capita for advanced education declined by 1.24%.

If the 1975-76 data is included, the decline in per capita support since 1969-70 was 11.48%. This indicates that the majority of the decline occurred in 1975, the same year that a 25% increase in tuition fees took

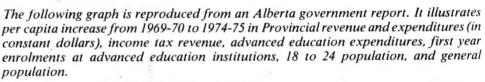

While per capita spending government support. for advanced education declined, the total per capita provincial financial cushion. Using "soft" expenditures in all areas increased at a much higher rate. the years, there will be enough to This indicates that the provincial cover $1\frac{1}{2}$ days of operating. government gave a lower priority to advanced education than it had in the past and that it gave to other areas.

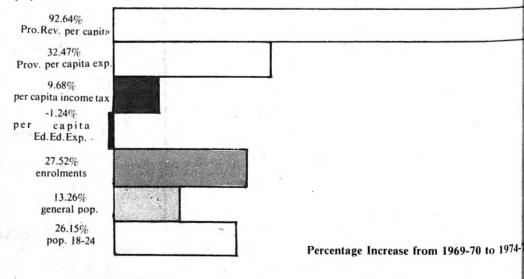

Another measure of the decline in funding is shown by the decrease in the portion of income tax contributions to the province that went to advanced education. In 1969-70 \$3.82 out of every \$100 went to meet the capital costs and \$8.38 went to meet the operating costs. In 1975-76 these amounts had declined to \$.72 and \$4.37 respectively. Less of the individual's tax dollar is presently being used to promote advanced education than in the past.

For the year 1978-79 the U of A requested a 15% increase in funding. The provincial government gave only an 8.25% increase. This has resulted in a \$6.2 million "shortfall." In effect, dueto increased operating costs of the university, this represents another cutback in provincial

The U of A does have a money, the reserves built up over

The government stated in capita support of the early 1970's that there should education has caused c be quality education available to which reduce the qua as many people as possible. Their education and has caused financial policies tend to go increases against this. The decreased per accessibility.

Ingineering Does; quotas & cuts

following are letters submitted to V.P. ance and Administration L.C. Leitch by jous deans As you will discover, the effects extensive.

Peter F. Adams, dean of Engineering

In response to an increasing student demand an engineering education and to a high strial demand for engineering graduates, the alty of Engineering adopted an Academic for the period 1975-1985 in November, 1975. I plan envisaged a controlled but steady ansion of the Faculty's staff and facilities at all 6-7% per year.

The student demand for an engineering gation remains at a high level and the demand engineering graduates in Alberta remains and despite a reduction in engineering activity he remainder of Canada.

One year ago Dr Donald Quon, then ociate Dean (planning), wrote to you in port of our request for increased funding. In submission, the anticipated needs for staff and rating funds were detailed in the light of the plty's Academic Plan. I enclose a copy since trends described in that submission are active the present time.

Continuation of the restrictive budgets rienced during the last few years will have specific results for the Faculty of Engineer-

he number of undergraduate students will eto be reduced. Our present quotas were set in cipation that the staff, space and operating is, requested in the Faculty's Academic Plan, id be available. With our present facilities the ulty, and some Departments in particular, is prowded and the quality of our programs has adversely affected. The restrictions will not be a significant difference in our first year ilment, however, an increasing number of lents will be refused entry at the second year and an even larger number will be refused y to the department of their choice.

The net result of this reduction will be that an asingly large proportion of engineering tions within the Province of Alberta will be the graduates from outside the Province. At ame time, our own students will be refused as at this University and will be unlikely to places in outside Universities.

he Faculty will be unable to continue to ond to the opportunities and challenges and to the industrial growth of the Province. Provincial Government has, as its major atives, the increased industrialization of the tagether with increased emphasis on the assing of our natural resources. The achieve-

ment of these objectives requires not only a supply of educated engineering manpower but also the development of a pool of high level engineering expertise in areas related to the development of Alberta's industries. If sufficient funds are not made available the Faculty, and thus the University of Alberta, will lose an important point of contact with our society and the importance and relevance of the University will be diminished.

Examples of specific programs that have been or will be influenced by restricted budgets

a) The Department of Mineral Engineering has received a special 5-year grant from the Department of Advanced Education and Manpower. This grant expires after the 1978-79 fiscal year, this program is directly related to the processing of our natural resources and it is absolutely essential that this type of support be continued. In fact, the University is committed to taking over the support of this program, but if restrictive budgets are to continue the University will have to make cuts in other important areas to honour this commitment.

b) The Faculty has been approached several times over the past five years by members of the Surveying profession to provide a viable program in Survey Engineering. We have been unable to respond to these requests in the past due either to lack of appropriate manpower or lack of funds. c) The Faculty has been approached by several outside groups to provide a program in Project Management. Discussions have been held with several construction companies, Syncrude and the Alberta Construction Association, to attempt to develop such a program. A program having significant impact in this area would require additional staff.

d) the Faculty of Engineering has experienced a significant increase in the number of graduate students enrolled. The number of applications for the coming year has increased once more. In contrast to some other areas of study, graduates form the M.Sc., M. Eng. and Ph.D. programs in engineering do not have difficulties in finding employment. In fact, to our knowledge, not one of our graduates is unemployed. Unless additional resources can be devoted to this area, the Faculty may soon have to refuse to accept graduate students in certain areas. Already laboratory space is at a premium and resources inadequate.

e) Our Electrical Engineering Department has been aware for some time that its offerings in the areas of Communications, Power Engineering and digital Electronics should be strengthened. Although some Faculty members have taken on extra responsibilities in an attempt to supply support in these areas, additional staff are required.

f) Many opportunities have been made available for our Faculty members to engage in research programs of direct interest to the development and processing of our natural resources. AOSTRA, AOSERP, Energy, Mines and Resources, are but a few of the sponsoring agencies. Because of the present commitments, our Faculty members are unable to move into these new, important areas. If additional staff cannot be obtained it appears likely that opportunities in these areas will be missed.

I would be pleased to expand on the above points and add other examples if required.

Peter F. Adams

Business Administration, the same

by D. G. Tyndall, acting dean of Business

Administration and Commerce

l assume that you wanted a relatively brief onse to your memo of July 19; if you want to detail, please advise me.

The impact of the severe budget restrictions his Faculty can be summarized very briefly as ows in statistical terms:

1970-71 1976-77 % increase

	olment demic F.T.E. Faculty \$1	1,202 50 ,040,310	2,283 63.47 \$1,411,000	90% 27% 36%
	Dollars demic F.T.E.	.042	.028	-28%
ă.	er Enrolment d Dollars	\$865.48	\$618.04	-28%
	er Enrolment		- full time on	uivalan

E. is an abbreviation for full time equivalent measure of full time professors)

The principle consequences of this drastic reduction in real teaching resources relative to enrolments in the Faculty have been:

1) The Admissions Quota. This will drastically lower the availability of University level education in Business for Alberta residents at a time when there is a clear need and effective demand for increased opportunities in this area.

2) Increases in average class size. This has lowered the quality of education in Business available to Alberta residents. (It was in order to prevent further deterioration and to restore the earlier quality level that permission to impose quotas was sought.)

3) Increases in teaching load of faculty. In an attempt to prevent excessive increases in class size, the Faculty has reluctantly accepted a significant increase in teaching load. This will inevitably have the effect of reducing the research output of the Faculty at a time when there is increased need for research in business problems, and will

make it more difficult to attract high quality staff to fill vacancies as they occur.

4) Reduction in course offerings. In order to staff the required basic courses offered by the Faculty, it has been necessary to cancel a number of important optional courses, e.g., Risk Management.

5) Inability to develop new programs. The Faculty has been unable to respond to requests for new programs to meet the needs of Alberta residents, e.g., graduate courses at Fort Macmurray, a Ph.D. program in Business, and programs in International Business.

More broadly, it should be recognized that expenditures on education in the Faculty of Business Administration and Commerce constitute an investment in the future economic growth of the Province and that, at this time in the Province's development, these should be increased in real terms, not decreased.

D.G. Tyndall

LAST MINUTE PRESS CONFERENCE...

Board of Governors excludes info

by Allen Young

The U of A Board of Governors (B of G) did not include important information in its submission to the provincial government requesting the 1978-79 operating grant, and there may be a reconsideration of the decision to raise tuition fees.

This was admitted by B of G chairman Eric Geddes at a press conference yesterday called to announce the board's intention to make further representation to government to demonstrate the need for more government funds.

After first denying that a coordinated U of A campaign to demonstrate needs already had been undertaken, Mr. Geddes confirmed claims by reporters that letters detailing the problems faced by individual faculties had been requested from all deans last summer.

The letters contain claims by deans that cutbacks are causing quotas, lack of funds mean some U of A medical students may not get accreditation because of inadequate instruction, and the library will definately become second rate if more money is not provided.

The letters were not contained in the operations grant request. Instead, excerpts outlinging some problems faced by a few faculties were sent to the government.

"The information you mention," Mr. Geddes told reporters, " is precisely the sort of information that could have been included in the submission and will be collected in the future."

Chancellor Ron Dalby indicated board members had met with the Premier and Minister of Advanced Education Sunday, and the government had displayed an eagerness to hear more information.

Geddes said the board would reconsider the possibility of re-examining the 1978 preliminary operating budget and the decision to raise fees.

He said at the outset of the press conference the university had been facing difficulties in maintaining academic standards because of inadequate funding

Geddes said the board for about three years now.

In response to a question of why the board was only initiating a campaign to "quantitatively and qualitatively" document the situation at this late date, he said the damage had only recently become apparent.

When asked what documentation of the university's needs

had already taken place, he some faculties had subm individual complaints on it ficient funds.

Last week university finance and administra Lorne Leitch told Gate submissions had been solic and received from most dea

Throughout the confent and during the special B confent meeting preceding, University and Chancellor Ron Dalby said was concerned with the problem of communication between university and the government.

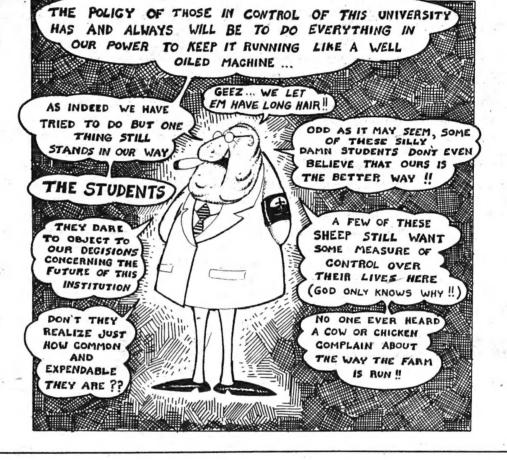

Mr. Dalby said the university had an urgent priority document for the public university's difficulties, refer to claims made in an Edmon Journal that this had not done. He said negotiat would be undertaken in an opublic manner.

The Board had passe statement opposing the pu demonstration at the legisla scheduled for tomorrow, be the press conference.

In a telephone interview night, university vp fina Lorne Leitch told Gateway had requested letters from all deans on the effects of austerity budgeting. He most of the deans had respon and that excerpts from som the letters had been sent to governments to illustrate faculty response.

The letters were placed in files and not presented to Board of Governors, he said

He added he had reque the letters to aid him in submission to the govern and the documents would likely be released.

You have to wonder: who does the Board of Governors represent?

Oh, the power of our magnificent leader! Power enough to ensure the public demonstration to the Legislature will not be graced with the presence of the president of the university. Power enough to demonstrate that the Board of Governors is little more than a political arm of the Progressive Conservative government, and that university autonomy is more cosmetic than real.

The president of the university, who, one week ago demonstrated to students and staff alike that he was firmly committed to this university and was serious enough about the declining quality of education caused by restrictive government financing to join students and staff in a march to the legislature, has now said he will not join the demonstration.

And it was clear that he requested the Board of Governors to make the decision for him.

By not supporting a public campaign to demonstrate the seriousness of the problems facing the university, the Board managed to prove it does not represent the best interests of the university: it does not represent the General Faculties Council, which voted overwhelmingly to support a demonstration against the government; nor does it represent the students, whose representatives worked hours to present a detailed brief to the Board in order to demonstrate their concern; nor does it represent the public who have a right to know exactly, in specific terms, how badly the universities are suffering.

The fact is that public opposition to the government—even if it has been largely in the form of student opposition, and has not yet achieved its full potential—

has indeed had an effect on the government. It's too bad that the Board of Governors is not willing to admit this.

What is most discouraging is that the Board chairman did not see fit to include in his budget presentation to the government a detailed analysis of the situation here on campus. Despite having access to letters from most of the deans, letters which went to great length to describe specific areas of damage as a result of six years of punitive government funding, the chairman did not regard this information important enough to include in his report.

This raises serious questions about the chairman's judgement and even about his and the Board's commitment to the university. Why wasn't the university's case—as outlined clearly and concisely by the faculty deans—presented in full, to the Minister of Advanced Education, to the MLAs and to the press? It doesn't seem as though the Board of Governors really want to let the public know about what's happening here.

Who can the students trust to support them? Will the General Faculties Council be the next groups to be pacified by our gracious leader? If they fall, if they fail to support us, we're on our own. But as students and as educators, we're together. At least for now.

Today Jay Spark meets with the Premier and the Minister of Advanced Education. Let's hope he will not forget, like the Board of Governors, that an institution of this sort must provide a high quality education to young Albertans.

D. McIntosh

Ed. Studen march

The Education Stud Association invites all Education students to meet outside the office (1-101 ed. ctr), at tomorrow morning when will proceed to HUB and join main rally. The purpose of action is twofold.:

This will, we hope, courage those Ed students tant about marching to de Their chances of joining far faces are greatly improved.

As Ed students, we more to lose than an extra dollars per year. The U Faculty of Education ha reputation as the best Facul Education in Western Ca and one of the best in Canal government cutbacks are a ed to continue, we stand to this reputation and with prestige resulting from bei Education graduate of the A. Our already poor prospects will get worse. therefore, important that Ed students, show our con

Participating in our march' to HUB will be by Worth, Dean of the Facult

VP Sales & S
- Ed Students

y W.E. Harris, Chairman, lepartment of Chemistry

Impact of past budgets on work of the Department of Chemistry Operating Grant Requests for 1978/79

We have done an analysis of our increased dentific costs during the period 1971-72 and 1977-78 ased on actual prices paid. A rough analysis indicates hat between 1971/72 and 1977/78 the cost of solvents as more than doubled. The cost of other chemicals as risen approximately 50%, Glassware has increased approximately 50% and laboratory accessories and ther items have risen between 40% and 50%.

During the same period the numbers of our cademic staff and non-academic staff have remained latively constant. The increase in total budget for two classes of employees between 1971-72 and 1971-78 is 47% and 62%. Our 1971/72 budget for applies and sundries was \$663,800 and our 1977/78 addet is \$627,290.

During the past year, the Canadian dollar has creased in value by approximately 10% in terms of EUS. dollar Since practically all of our fentific equipment and chemicals come from the U., this reflects basically a 10% drop in buying power. hus, in terms of buying power, we have a Supplies and Sundries budget of approximately \$250,000 using \$71/72 as a base.

The factors which allowed us to get by up to now habudget that has been cut this drastically is that our aduate student appointments were down from 140 in 171/72 to 100 in 1976/77. Also, during the same period (time, NRC grants remained nearly constant while daries for assistants went up and consequently not as any PDFs and Research Associates could be pointed. The relative constant level of ungraduate students during this same period of time to eliminated the need for new academic staff. The wacademic staff hired as replacements during this

Science hit hard by cutbacks, Chem dept. head outlines problems

period turned out to be inexpensive to set up since they could use a considerable amount of the equipment from their predecessors.

We are liable to be in considerably more difficulty in the years to come if finances are not increased more realistically in proportion to increased costs. This year we expect to have ll0 graduate students and since NRC grants seem to be increasing we can expect to have more PDFs and Research Associates.

The decrease in graduate students and the

inadequate funding from NRC, which has basically reduced the number of PDFs and RAs, has been a strong demoralizing factor with the staff over the past few years. It would be an additional demoralizing factor if we were to have the graduate students, PDFs and RAs, but not sufficient funds for chemicals and equipment to properly carry on their work.

It is imperative that adequate funding be reinstated if excellence in teaching and research is to be maintained in the Department.

The Prophet

by Tehlal Ahmbrahg

His power came from some great reservoir of Italian wine; else it could not have been so heady, yet massuming; but the majesty and the beauty of the amguage with which he cloaked it were enough to send me running for the aspirin."

and the Master was helping Alma finish up her term roject;

ainstakingly copying her notes onto a parchment late

and he looked up from the scroll and peered through he flickering flame; and he beheld a hooded figure in the gloom at the

ntrance of the cave;
and the Master, startled, began to rise;

but the figure threw off his hood from about his face; and they gasped, for it was Hargun, the Elder;

hief of the Sages of the white towers of Bala-tur; and when the Master had regained his speech, he sclaimed:

yAllah, you gave us a start, Hairy! What are you oing out here at this time of night?

and Hargun, the Elder, removed his cloak and said, rarily:

came because I am in desperate need of help but I buld have no one know of it;

and Hargun spoke grimly of the hard times that had stallen the white towers of Bala-tur;

elling them how the Sheik of Khal-Ghar-ih and his enchman, Bad Bertie, the Tyrant, had refused to open the coffers of the royal treasury;

and how the flow of funds which were the lifeblood of the white towers, had dried to a trickle;

therefore the disciples, who thirsted after knowledge, and the sages, who thirsted after government grants, adjoined forces;

alace;

odemand a loosening of the purse strings.

In the largun, the Elder paused and the Master

Revied:

of What's the problem Hairy? You know kids—
ey're always doing these crazy things;
and if the sages get a little carried away, well, look on it

a quiet afternoon when you'll be able to get caught on your paperwork.

And Hargun the Elder said, a little sheepishly: Not exactly. You see, I agreed to march with the disciples.

And the Master shrugged and said:

Even a fish wouldn't get into trouble if he kept his mouth shut, Hairy.

And Hargun the Elder accepted this with a nod and continued:

Since the initial shock has worn off. I have gotten used

Since the initial shock has worn off, I have gotten used to the idea;

But I wouldn't want it to be said that I marched without style;

And I never went on a protest march before:

And I never went on a protest march before; So I don't know much about the etiquette of these

And I was hoping you could advise me on what to say and what to wear and how to act.

And a smile played across the Master's lips as he began to counsel Hargun the Elder on the fine points of protest marching, saying:

The first thing we have to do is get you a good marching song. You can't lead a protest march without a good marching song or a nice, monotonous chant. And Hargun the Elder offered brightly:

I know the words to,

"United we stand,
Divided we fall,
And if our backs should ever be against the wall,
We'll be together-r-r-r ..."

And the master reproached him gently, saying: Under the circumstances, I think that's overdoing it a bit, Hairy.

And Alma, who had been listening, suggested: You can use the tune from, "What A Friend We Have In Allah," and put in some different words, like:

> "What a tyrant is Bad Bertie, Mouth is open, brain is shut. What a privilege to worry, O-ver each new budget cut ..."

And the Master agreed that this was appropriate, saying:

The disciples could chant their own version:

What a privilege to stu-dy, In a school that's be-ing shut ...

And Hargun the Elder took these words down, humming as he wrote, and he asked what he should wear

And the Master questioned him, saying: Do you have any blue jeans, Hairy?

"No. But I could buy some!" And he began to make another note in his little reminder book, but the Master interrupted him:

Don't do that, Hairy. Nobody wears new blue jeans in public. They have to be old and faded. Do you have any hunting clothes?

No. I gave up grouse-hunting years ago. Why can't I just wear a suit and tie? That's what I'm comfortable in! But the Master explained to him:

Listen, Hairy, you can't wear a suit and tie. That style of dress is reserved for the secret police who have infiltrated the march. No one will want to walk beside you. What's the oldest outfit you own?

And Hargun the Elder thought for a moment and then he replied:

I still have my old khakies from the days when the British were here - bush jacket; shorts, and the pith helmet.

And the Master buried his face while he considered this privately and then he ruled:

All right! Wear that. It's so far out, it might just be in; but as soon as you get home, throw them all in a heap in the corner and leave them there until the day of the march. When you put them on, fill the pockets of the bush jacket with granola and during the march, munch on a little from time to time. If anyone asks what you are eating, offer them a handful.

And Hargun wrote all this down carefully, and then asked:

"What do I carry?"

Nothing, Hairy. No signs. No placards. Leave that for the people who can say what they have to say in less than 2500 words. Keep your hands free for linking up with others in a gesture of solidaritywhen you get near the palace.

And when he had noted this, Hargun the Elder put on his cloak and prepared to leave and thanked them for their help;

And the Master added, in a conspiratorial tone: Leave your eyeglasses at home, Hairy. Too dangerous. Better get yourself some cheap sunglasses.

And Hargun noted this in his little book and with a swish of his cloak disappeared into the night; And the Master called after him:

Get the kind with the mirrored lenses, Hairy!

Arts cuts

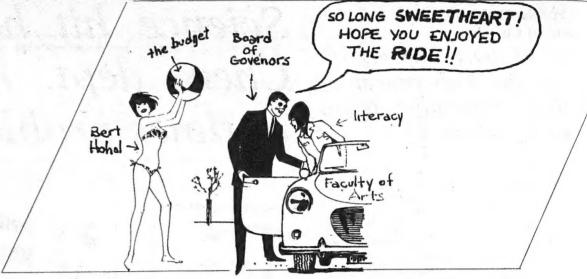

by George Baldwin, dean of Arts

I really cannot bring myself to repeat the dreary litany of the past in answer to your request for a description of the impact on our Faculty of another restrictive budget, this year we submitted requests from our seventeen departments for a total adjustment of \$645,000. We had already slashed their statements of legitimate need by \$350,000. We were allocated \$167,000, of which \$157,000 went to offset inflationary increases. Our departments had documented a need for 20 staff appointments and 24 sessionals. We forwarded a request for 12 of each. In fact our allocation allowed us to make no additional academic appointments at all, other than of the most modest and temporary sort in Canadian Studies.

The result is that we must continue to deny to our students in the social sciences the university teaching they have contracted for (see Sociology's WSH ratio of 375/l); in Canadian history we cannot handle the demand; in Art & Design, Classics, and Romance Languages we are falling behind badly (in relation to departmental workload increases since 1973/4 of 23%, 67%, and 15%, respectively); and nowhere can we take on additional responsibilities, however pressing.

Two areas of need will serve as examples. First, we have this year concluded an elaborate study of the community's considerable interest in Film, and the Faculty has approved a modest beginning in this area said to be of special concern to the Province; but there is no money to undertake it.

Second, we have attempted to respond positively and creatively to the University's urgings that we do something about the lack of proficiency in English of our students (or rather, of the University's students) - by planning to

upgrade our teaching through the appointment of an Associate Professor to coordinate our efforts, introducing a 300-level course in expository writing (for 120 students, mainly Education, in 6 sections), and strengthening one of our chief freshman English courses to provide for substantially more in the way of composition instruction. Only in the last case have we been able to move, by shifting soft funds from elsewhere.

You will realize, of course, that I am not here providing you with a list of functions that have been sacrificed: that would, literally, run to pages. Rather, I am reporting that we are, as a Faculty, being severely hampered, in some cases crippled, in every area of our operation, although not equally so in each of our departments. Therein, I think, is a profoundly important point about our operation. The Faculty of Arts is made up of 17 different disciplines, with - in many cases subdivisions. The parts are not interchangeable where staff are concerned. Except for the transfer of some soft funds, we were able this year, in an \$11,000,000 budget, to shift one position. Thus when the University decides that we are, as a Faculty, in a modest growth situation and therefore ineligible for significant workload

increases, it works hardships on us in components that few other divisions in institution experience - merely because of structure.

The resultant strains are so great that we signs from time to time of major structuchanges being contemplated as desperat measures. More immediately relevant, however are having to retrench, downgrade, double and generally sacrifice standards at every turn the point where quality in the Faculty is more amore coming to reside almost exclusively individuals; and disciplines, with the very green contribution that they can make collective when healthy, are some cases slipping imediocrity.

We have not made the assumption that money is the only answer. Our administra have been urged to exploit fully what is alre available, and many of them have risen to challenge; but there is a point, as you well kn beyond which new approaches will not can university - or any other institution, for matter - and we have in most areas long s reached it.

The National Shakespeare Company presents

Tues. March 21 8 pm OTHELLO
Wed. March 22 8 pm AS YOU LIKE IT
Thurs. March 23 8 pm A WINTER'S TALE

A joyous comedy of disguised lovers and depose Dukes, AS YOU LIKE IT is one of Shakespeare funniest and best-loved comedies. This tale of the different aspects of love from the familial to the romantic, takes us to the pastoral setting of the Fore or Arden. Here the lawful Duke of the French province lives with his faithful followers. His daught Rosalind, disguised as a man, comes to the fore searching for her beloved Orlando. The hilariot complications that Shakespeare creates are total accessible to modern audiences. The disguises unray and the plot threads are sewn together to the delighter audiences of all ages and all times.

This bittersweet comedy unfolds in a mythical atmosphere; with jealous kings. imprisoned queens, brave princes, disquised princesses, and wise Oracles.

Shakespeare's tragic tale of romance, jealousy a political intrigue has inspired controversy a discussion since it was first presented. The sec marriage of Othello, a Moor of Venice, to Desdemo leads to a public hearing where Desdemona's fall tries to prove that Othello won his daughter by usi witchcraft. Proving this untrue, the lovers go Cyprus where Othello, a General, is to lead a wagainst the Turks. One of his officers, Lago, anger at not being made a lieutenant and imagining that Moor was too fond of his wife Emilia, conceives successful scheme of revenge.

Look out Moncton. Here they come

C 2 Bears 1 IS 9 UBC 1

There was never any doubt. The night before the big ada West final game on day several Golden Bear vers had predicted the outne of the 9-1, shellacking of the C Thunderbirds.

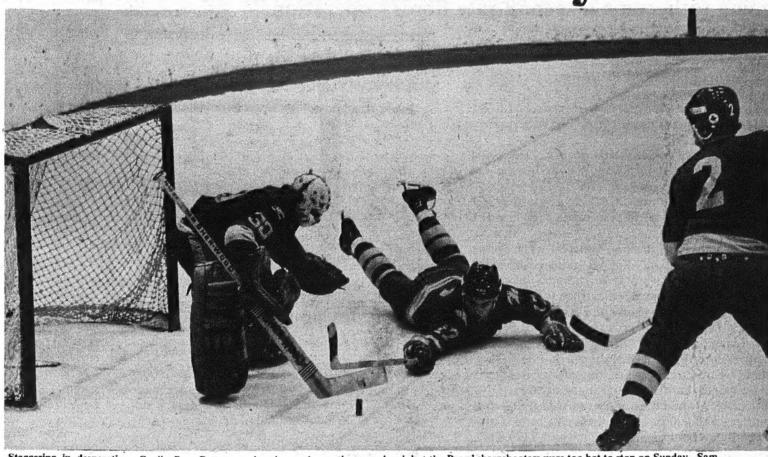

"We will blow them out, haven't got a chance norrow," was only one of eral comments expressed at a her subdued party on Saturnight after the Bears had beaten 2-1 on a powerplay by Doug Tottenham with 53 seconds left in the game.

The bold predictions came as a flawless Golden Bear n simply overpowered a fine C squad, to capture their 12th stern conference chamnship in the last 19 years der coach Clare Drake.

Every year the UBC underbirds take the finals to limit and once again they the Golden Bears' players coaches fits as they forced third game in the series by ming their only game of the r in Edmonton on Saturday

After Friday night's jittery win by the Bears the chamne was ordered in anticipaof a two game sweep. Most the Bears appeared a little gight on Friday, especially alie Ted Poplawski, who was bbing blindly at the puck most the night, but a sellout crowd en does that to the home team. vin Primeau got two goals day to pace the Bears and rrell Zaparniuk and Jim Carr led singles. Primeau's second rker was an empty net goal as n Patterson was pulled for an a attacker. Derek Williams Sean Boyd replied for the

Saturday's game was a iller from start to finish. ven I would have paid to see game," stated a weary Clare ke after the tilt. Drake is used he pressure of a three game

weekend, but the Bears' sharpshooters were too hot to stop on Sunday. Sam Staggering in desperation...Goalie Ron Patterson played superb on the flounders on the ice like a duck out of water in another close encounter with a Bear shot.

series, but that's not to say he enjoys them.

It was a wide open, hard hitting game on Saturday as the T-Birds relentlessly hung on behind the sparkling play of goaltender Ron Patterson, who blocked 28 shots, many of them headed for the scoresheet. Derek Williams put the Birds ahead with a goal at 18:44 of the first period that beat goaler Jack Cummings cleanly. Jim Causgrove tied it up late in the second period to set the stage for the powerplay drive by Tottenham from the point after a wild third period kept the fans buzzing.

"We used a different system tonight," explained coach Drake. "It is halfway between the pressure forechecking system and the sag defense that we sometimes use. It's tailored to

that UBC does rather well."

The defense changed on the game as the Bears reverted to the pressure forechecking system ice. Dave Hindmarsh crashed into goalie Ron Patterson during the opening seconds of the game and Patterson had to be pulled halfway through the second period with the score 4-0 at that point. Patterson conceded that no goalie-could have stopped the onslaught as the Bears executed perfectly, scoring a couple of picture goals in the process. John Devaney took a pass from Jim Causgrove and set up Ted Olson Spring engineered a power play

practice.'

"Everything that could go Sunday and so did the scope of wrong did." That was all UBC coach Bert Halliwell could muster after the game. He and chased the T-Birds off the conceded that they were just too strong for his club and paid the Bears the highest compliment by stating, "we just lost to the eventual National Champions, you wait and see."

Other Bear marksmen were Mike Broadfoot, Primeau with his second, Darrell Zaparniuk, Larry Riggen, Don Spring, Dave Hindmarsh, Olson and Bruce Rolin, while Jim Stuart notched the only UBC goal.

Spring's goal was worth with a classic two on none pass mentioning as you don't often for the eighth Bear goal and Don see a defenseman score from his own blueline. After Bruce Rolin goal by Kevin Primeau that was, had checked goalie Dave Fisher. as coach Drake put it, "just out of the way after Fisher had

counteract some of the things exactly the way we try to do it in tried to stickhandle past a couple of Bears, Spring flipped a high bouncing shot down the ice. The young defenseman was jumping for joy even before the puck had crosses the BC blueline.

> After the suds had settled (all the coaches and managers were chucked in the showers) coach Drake conceded that the 2-1-2 pressure defense had worked best all year long, and he hinted that there wasn't much doubt about which system to use in Moncton in the National Finals.

> The Golden Bear hockey team thanked the fans for cheering them on this year with a salute at the end of Sunday's game. Raising their sticks in unison to both sides of the crowd was a super way for a bunch of class athletes to say thanks to the great hockey fans at the U of A. It's a tradition they learned from the Japanese players and it's something that should be carried on next year by the team.

Cutbacks will affect athletic teams

Government cutbacks will hit the athletic department as hard the athletic department does not get any more outside support ercollegiate teams such as the Golden Bear hockey team, it the budget. buld mean a lot less travelling in future years; it could even mean end of all teams except those which can generate revenue from lowds at the home games. This means that conceivably the only ams left would be the hockey, football and basketball squads hat make some money from the gate each year. This has already cured at such places as St. Mary's University in Halifax, and it ould happen at Alberta in a few years.

John Milligan, the business manager of the department of letics, explained how the budget is controlled. The athletic partment is supposed to be self-supporting, running itself out of student fees that everyone pays at the start of the year and also ing money from crowds to keep the unit as an entirely selfpporting venture. Until the last few years, they were successful at but increased staff costs have blown the budget for them in each the last two years. "We now have to make up \$12,000 because of ff costs and that hs to come out of next year's budget, so another ort will likely get slashed," added Milligan.

Over \$200,000 must be cut from next year's budget and a lot it is because the governing bodies at the top level do not make the money that has to be paid out to staff members whose aries go up. There used to be 20 men's team sports at the iversity, and now there are only about a dozen. Fencing and by are gone and judo is on the way out, and the women are in a milar bind. They have had the number of teams competing shed by one third, to eight, down from the 12 teams that used to around. Milligan also hinted that if the cutbacks continue and

the rest of the academic community and for the members of the then even a major sport like football would have to be axed from

In the department of Physical Education the squeeze is also on and the big thing that will occur is that the quality of instructors will go down and the number of activity courses open to students outside the faculty will be cut.

"It depends a lot on how we can use our resources," explained Pat Bates who has the arduous job of programming hundreds of students into the proper courses. The social dance classes that have been so popular the last few years will no longer be made available to students outside the Phys. Ed. faculty. The biggest crises facing the faculty besides course cutbacks is the loss of staff. When someone leaves they cannot replace him with another equally experienced staff member, they have to move a grad student up to try and take up the slack. This reflects back to the students eventually, who are faced with a very poor quality of leadership. Even the secretaries are being cut to save money on the overall budget.

Another area that will suffer is research, one of the first things that will be cut in a dwindling system, but research builds the credibility of the university and opens new areas of study. Without it a program cannot keep relevant material flowing to the students.

Cutbacks affect everyone involved with an academic program and even people outside the university community that have to rent facilities for their groups or teams. Increasing the rental on, say, the hockey ice or the rooms for meeting is one way to help raise more money, but someone always pays in the end.

March on the legislature Wednesday; it means a lot to all of us.

THE BEAR FACTS:

St. Francis Xavier upset the number three ranked St. Mary's Huskies Monday night by a 4-2 score to win their best of five series three games to two. St. Francis Xavier now advances to the National finals in a three team pool with the Regina Cougars and the Bears. The other three team pool consists of the Moncton Blue Eagles, the Toronto Blues and the Concordia Stingers from Montreal. St. Mary's had won their conference seven times since 1969. St. F-X had last won it two years ago. Don't forget the win or lose celebration Wed. and Thurs. when the team returns. The Bears are also sponsoring the sixfoot screen video projection of the final game Sunday, March 19 at 11:00 a.m. to be shown in Tory TLB 11 - absolutely free - just another service of the team to say thanks for all their loyal supporters throughout the year.

Library quality will be 2nd rate

"If we don't get an infusion to make up this year's loss, and next year's inflation rate, we are definitely going to become a second-rate library operation."

Cutbacks to the university library are usurping the educational responsibilities of this university, (to the people on and off this campus), and straining the resources necessary for learning and research.

In a Gateway interview this weekend, the Head Librarian of the University of Alberta, Mr. Bruce Peel, said:

A university is judged by its library. The library turns a university into a mecca, attracting top graduate students and the best professors.

The university library has long enjoyed a fine reputation in this country because they have 1.8 million volumes, 450,000 government publications, 1.2 million micro-forms (films, cards ...) and roughly 20,000 audio-visual aids.

But a reputation is ongoing. You cannot stand on it and hope it will suffice for the future,

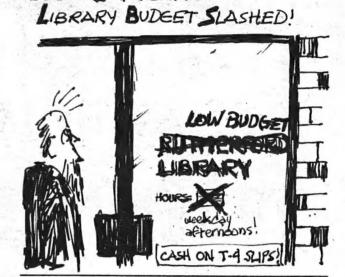

Provincial government cutbacks from university funding will force the library to cutback its expenditures by \$150,000. \$80,000 from acquisitions, \$70,000 from services. Extensive as these figures are, they are misleading. The case is even worse than the initial figures show:

Effectively, when the library was told that it must cutback \$80,000 in acquisitions, the total it must actually cutback is in the vicinity of \$300,000.

The reasons for this are numerous. Book and periodical prices over the last few years have risen sharply because of inflation. Forced to purchase outside of this country, the library must deal with the pressure of worldwide inflation rates. (Inflation in Britain, for example, is considerably higher than in this country). Likewise, the decreased value of the Canadian dollar affects the library's purchasing power. Understandably, a library which must purchase 1/3 of its acquisition from the U.S., 1/3 from Europe, and 1/4 from

News Item:

by Wayne Kondro

Britain is going to be very hard hit by devaluation. (Currently only 5% of library purchases are made in Canada where the dollar devaluation is not directly felt). What is needed to maintain even the status quo (in a state of decline at that) is an increase in the library's current operating budget. Instead, what the library gets, is a cutback.

As it is, we must decrease our intake by an approximate total of 14,000 from a normal intake of 100,000. We cannot cut standing orders and blanket orders — those are continuations which we will be forced to pay an increased price for. Five years ago in a similar crisis we cut 2,000 titles from some 17,000 periodicals. I would argue that at that time we cut what material some might argue was unnecessary.

The end result of all this is gaps in our libra system. Gaps despite increased campus needs a clamouring public needs. In the event of an interprovincial library network, such as the or recommended by Downey Associates in a stucommissioned by the government we will need large resource base.

How can a province which claims to committed to developing itself into an import international area allow its libraries, the very of education, to decline? How can they possibly justify not having funded the library so it in institute the Dobos system and thus be complete with the national library?

As if this were insufficient, on top of (\$300,000, there are cutbacks to come in direct student services:

We are told we must make cuts in non-sala holdings. Supplies will be cut by \$30,000. \$46,0 will be taken from our casual or tempora employment. Since it is the part-time staff whi gives the library its flexibility we will be forced shorten library hours. Circulation services will cut by one-quarter. In addition, because of the high turnover support staff in the library there will be effects such areas as reserve reading rooms.

With effects such as these how can university expect to attract top-grade educator researchers and students? Can't you just see Nobel Prize winner going to work for a university with inadequate library resources? Or a gradua student coming to a university with the same? At what is the level of undergraduate education going to become if we do not allow students account to the knowledge and thought that have precedent them?

It takes more than theory to start a practice.

Small businesses thrive on sound management and solid financing. You know it, we know it. That's why our Business Program for Professionals combines expert financial advice with the cold hard cash it takes to start your business, to keep it going, or to expand it.

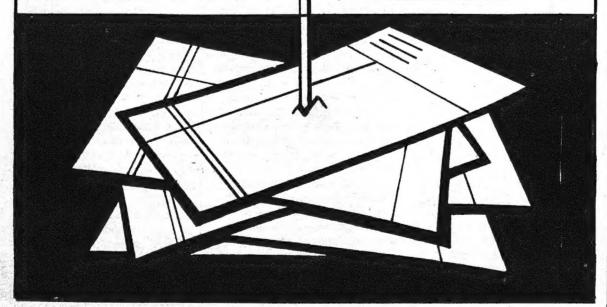

We can provide you with as much as \$50,000 depending on your circumstances. Our operating loans are geared to yearly terms with revolving payments based on your cash flow. And our capital loans have terms up to 10 years with flexible re-payment schedules.

As an independent professional, this program is available to you through any of our branches. Ask about it and you'll find it's more tangible than talk.

ELECTION DAY: FRI. MARCH 17

The Lougheeds Created and Written by Peter Birnie

As the Pacific Western 737 began its slow descent to Edmonton Municipal, Peter Lougheed gazed reflectively out the window. It had been a hard day for the premier - breakfast in Red Deer with a group of irate farmers who threatened to flood the premier's rec room if he went through with his plans to dam up the Red Deer River Valley; lunch at the Syncrude plant in Fort McMurray, where a bucket loader had accidentally run over his foot and raised one hell of a blister; and now he was returning to the capital to face a group of students protesting cutbacks in education grants.

"Shit," he thought to himself. "Shit, shit, shit," he repeated.

When he arrived at the legislature a sizable crowd was on hand to boo and jeer. As he climbed the steps an overripe tomato narrowly missed him. He tried to speak to the mob, to explain the government's position, but was met with a chorus of "Peter, Peter, Pumpkin Eater!" and "Nyah nyah nyah nyah nyah!!"

In the elevator up to his office he noticed that someone had scrawled obscenities on the little blue operating license above the buttons. And when he finally opened his office door and stepped in, he was stunned to find raw meat scattered over the desk and chairs.

"Why me, Lord? Why Me?" he muttered softly. Lougheed had never meant to incite riots with this education cutback thing. Why, he'd been a student at the U. of A. himself. Those were the days — panty raids and goldfish eating, running the Student Union and warming the bench at football games. Mind you, his father had footed the bill for six years of fun and games, but that was beside the point. The important thing was that he had been happy. Now this group of bandy-eyed academics was ruining his day by accusing him of being neurotic!! Of all the nerve! That bullet-proof glass in the outer office was there because he didn't want any lunatics intent on finding their exgirlfriends to come barging in and blow his nose off!

And the M-16's issued to the commissionaires were there just to scare the school children on tour, making sure they didn't spit in the fountain and throw Mars Bars wrappers in the House.

The group of protesters, meanwhile, had spotted Bert Hohol hightailing it out the south entrance, and proceeded to give chase. The minister's Chevrolet Bel-Air made it as far as Jasper Avenue before they managed to catch up and drag him, kicking and screaming, from the car. They were just about to carry him back to the university, where he would be hung by his toes from the Tory building until he agreed to increase spending, when the City Police arrived on the scene and proceeded to ticket everyone for illegal parking.

Meanwhile, in the plush offices of Edmonton Journal publisher J.P. O'Calaghan, an aging columnist sat, quietly wringing his hands. O'Calaghan marched back and forth, yelling at the top of his lungs "You can't leave! We've given you the best years of our lives! We've slaved over hot presses and CRT's for you! And now this!"

Frank Hutton, the Grand Old Man of the newsroom, had just announced that he was leaving the *Journal* for a new career at the *Edmonton Daily Sun*, the new paper from Toronto.

"But you've gotta understand, J.P. - they're offering me the opportunity of a lifetime! A column on the editorial page where I can rave about City Council all I want! A twice-weekly "We Hate Edmonton Transit and Here's Why" photo feature! And to top it all off, they promise to give me a company car that puts my Journal Studebaker to shame - an almost brandnew Plymouth Fury with "For All the Best in Tits and Bums Journalism, Read the Sun!" painted on the side!"

"You can't leave me!" O'Calaghan wailed. "You're the only one left! If you go, who'll make the newsroom coffee?"

'A Modest Proposal' - This Week Only, S

by Rosaleen Delooze

It is indeed depressing to read in the daily newspapers of the sorry state of our world. As each day goes by, we appear to be inundated by problems which, in spite of the advances of technology, and the efforts of highly sophisticated social service agencies, appear to increase—rather than decrease.

I have spent much time in serious consideration of these problems, and though I have made every attempt to look at the solutions offered by others with fairness, and have even joined forces with public spirited citizens, in a determined effort to help make their solution work, I have to admit that, though some schemes have merit, none solves the major problems that exist with any degree of satisfaction.

Recently, I had an idea which, I think, would do far more than merely solve our problems; I believe my idea could provide us with a lifestyle that can only be described as idyllic. But first, let us look at the problems we would like to rid ourselves of.

We are alternately concerned about inflation and unemployment. We are concerned about pollution, and about a world which is rapidly becoming overcrowded and underfed. Twenty years ago, a phrase such as 'depleting mineral resources' was unheard of, and the word illiterate was used only in connection with the inhabitants of those mysterious, far-away countries we liked to refer to as 'underdeveloped'. Now those words and phrases apply to us — and to our circumstances.

Our ears are assaulted with distressing, on-going arguments about abortion, capital punishment, and gun control. Our minds are confused with the influx of new ideas, new inven-

tions, and added information; all of which we must absorb, if we are to survive in a highly competitive world.

Through all of this, our bodies suffer — so that even our own personal future looks dismal. Heart disease, resulting from poor diet and tension, is our number one killer, with alcoholism a close second.

Though we ask ourselves, over and over, whether the struggle and confusion of indistrialisation is worth the effort it takes, we continue, in order that we might send our children to high-priced schools — so that they might have a better life. Yet statistics show that juvenile crime is on the upswing; and a study on the proficiency in English, undertaken by the University of Alberta, showed that illiteracy is now a matter of grave concern in Canada.

Increases in the costs of education, and severe cut-backs in educational funding, add to our worries. The knowledge that each generation heaps blame upon the preceding generation for the sorry state of the world which they were forced to inherit, causes us to doubt even the value of honest effort.

In the clamour of industry, there is little time to consider where we are heading. Society no longer 'waits for Godot,' society is riding high on a mindless, technological rollercoaster hellbent on a journey without rest stops.

My solution is a simple one, based on sound common sense, and is a logical conclusion of a situation which has been created by two fairly recent proposals, made by our own government. If you will allow me, I will describe these two governmental proposals, after first supplying you with some necessary background information, in order that you will grasp our

situation fully. Then, I am sure you will agree that my scheme is not only a logical conclusion of these proposals, but the answer to every single problem that plagues society today.

We in Alberta are fortunate enough to have had a plentiful supply of oil and gas. Though there are conflicting reports concerning the amount of oil and gas available for future use, one thing is clear — our energy resources will not last indefinitely

The profits from our oil and gas sales are such that we amass a sum of surplus money, amounting to one and one-half billion dollars annually. A bill was passed by the Legislature, proposing that this one and one-half billion dollars, together with thirty percent of all future, non-renewable resource revenue, be held in trust, in a fund which will be known as the 'Alberta Heritage Savings Trust Fund' for "the benefit of the people of Alberta in future years."

Since my proposal concerns the use of this money 'for the benefit of Albertans' — to solve the problems that would plague us for all of the forseeable future, I would have you consider, if you will, the magnitude of the sum of money we are discussing. Thirty percent of current resource revenue amounts to one-half billion dollars annually. Presumably, this figure will be greater in future years as the price of oil and gas increases. However, even without any increase in energy prices, the initial deposit of one and onehalf billion dollars, fed with an annual deposit of another half billion dollars, invested at ten percent interest, compounded annually, would amount to approximately forty billion dollars, within twenty years.

You will notice that our government does not stipulate

the use of the Heritage Fund (by allowing funds for research purposes, for example), our government merely proposes that the money 'be available' at 'some future date', and that the fund is vaguely associated with the depletion of our resources. Whether the government intends that we should use this money to create energy, by means of one giant dollar-bill-bonfire, is not clear.

That brings me to a second, and more recent government decision. A decision which was made in 1976 in spite of our concerns over the alarming rise in the incidence of illiteracy in Alberta, there would be no increase in funding for

educational purposes. Thi tion has altered little sind date.

lt follows, then, that we are facing the eventual tion of our energy reso and, since the poor qual education in this propromises to inhibit intelligrowth, while the high education promises to printellectual pursuit, we fact only a depletion of our precious resource of all resource of the trained mint the end of industry and merce along with it.

Without education, can be no research, and w research there can be no means to replace present

Bishops University Scholarship Exchange Program

- an English liberal arts university in Lennoxville, Quebec
- scholarship includes remission of tuition and fees at Bishops

Qualifications:

- must have completed one year of a 3 or 4 year degree
- must return to the U of A for final year
- be a full time undergraduate student
- be a Canadian citizen or landed immigrant

Applications are available from THE STUDENT AWARDS OFFICE, 252 Athabasca.

Application Deadline: 17 March 1978

Lifetime Guarantee! Deal

energy. Without new forms of ergy, there can be neither dustry nor commerce.

By reason alone, we must mit, therefore, that our hools are both unnecessary obsolete. I propose then. all schools be closed imdiately.

At first reading, that may and like a shocking proposal. itso! For, I contend, the value education has been long overed. Consider, if you will, the lic life led by our Canadian dians. While we suffer the sions of industrial life, our ve Indian roams the counside, hunting and fishing a white on holiday! - and Because of the difference in

our education! While we pay, and feel shame for the astute business dealings of early pioneers, our native Indian benefits from ancestoral ignorance! As yourselves — would the Canadian Indian be able to lay claim to the entire Syncrude development, as it exists today, were it not for the fact that his ancestors did not know a cross from a quorum? I say not!

We have come to accept education and industry as meaning progress. Can we really say that we have progressed, when every stride man takes from his natural beginnings is a stride toward an unnatural and worrysome end?

Is there a reason why we

destined to cease, anyhow? When we have money enough leisure time, for all! that we can afford not to work? We can live, quite comfortably, recently, that the smoking of on the Heritage Fund!

without pollution. Without industry, we are without the constant pressure to work, and to worry endlessley about the industry, our chemical plants acquisition of material goods and services, which have become the status symbols of an overly competitive society. Even our jails would, in the main, be unnecessary, for if we were to cease the manufacturing of the things society has learned to covet, and if the pressure of materialistic acquisition were work for the willing, and increase removed, so too would the our capital of forty million temptation to steal, and to treat dollars. others with violence and envy.

The present problems of over-crowding, because of the lack of housing, would end also, since all existing office blocks and department stores could be converted for that purpose. Liquor stores, and companies manufacturing alcoholic beverages would, of course, close, thus sharply reducing the problems associated with drink. Of course, there would be a few people who would, undoubtedly, make their own alcohol, but not so many that we could describe drinking as our second major health problem!

There are those among us who have, unfortunately, come to regard the routine of school and job as integral to their lives, so much so that a new phrase was coined to describe even that! It is 'the work ethic'. Those people might quibble with my proposals, on the grounds that life would be 'meaningless' for them, without work. They need have no fear, for an idyllic society must provide for the needs and wants of all. Since I free society, in any case. Thirdly, have promised such a society,

if we are aware that industry is their wishes in mind. There would be work, as well as ample

Doctors have admitted marijuana is not injurious to Without industry, we are health. If Albertans were to seize upon this product, and we were to grow marijuana, on the land that is presently being used for could be converted for its production. While supplying ourselves with a delightful new relaxant, which would replace alcohol, we would be in a position to supply a world demand for a healthy, non-habit forming, pleasurable substance, and, at the same time, provide

If we remain ever cautious not to return to the materialistic, industrial society, our money could then be used to supply us with clothing, and with foods that cannot be grown in our province. If we were to take turns farming, then our entire capital could be used for sheer pleasure!

Of course, our money would not last indefinitely, and that is where we would solve the problem of abortion. The question, whether the fetus is human life or not, has provoked argument for decades. If we were to make sterilization a requirement for living in Alberta, it would be to our profound advantage! One, we would put an end to this boring question altogether since, if there is no fetus there can be no question of life. Two, though we would allow all existing children to remain, we would remove the possibility of parental blame for an unsatisfactory world, for within twelve years, the nuisance of small children would be overcome, and no child would be likely to complain of a problemwe would insure that our capital

should wait for industry to cease, then naturally I have borne even was not unnecessarily depleted, and we could look forward to an age when old people were a joyfully accepted part of society.

> I feel compelled to assure you that I have no personal interest in this scheme, and do not stand to gain financially or otherwise. I am bound, by family promises, to return to Oxford, England, where money is tight and the standard of education is threateningly high. There is but one consolation for me. While I eke out my miserable existence in this struggling, intellectuallyoriented town, there will be a certain degree of satisfaction that I have left the people of Alberta wise, to the perils of education, and I will remain happy in the knowledge that Albertans alone will know the pure bliss of ignorance and indolence.

How many will march, and why?

by Kent Blinston

Students participating in a Gateway survey expressed concern over the detrimental effects of cutbacks.

Students participating in a teaching commitments.

Students were as questions: 1) What do y about the quality of edu

The Gateway interviewed 30 students on campus Thursday to see how strongly they felt on the issues of cutbacks and fee hikes.

The major worries were a lack of new books in the libraries and a shortage of qualified professors.

Of the 30, only ten said they were not going to march; two

were education students with teaching commitments.

Students were asked five questions: I) What do you think about the quality of education at the U. of A.? 2) How will cutbacks such as the \$150,000 cut from the library budget affect the university? 3)Does the government have a responsibility to fund post-secondary education and if so are they living up to that responsibility? 4) What will the long range effects of the cutbacks be? 5) Will you be joining the

protest march to the legislature Sandy on Wednesday?

Agriculty

A sample of the responses:

Dell Manning, Science 4

1) It's not very good. You don't have to put out at all to get a good mark.

2) I don't think it will make much difference; a lot of stuff in the library is waste.

3) Not entirely. You appreciate it more if you pay for it yourself.
5) No, I think we're lucky to have what we've got.

Sandy McDonald, Agriculture 2

Right now it is acceptable.
 It will cut down people's chances of getting a degree.

3) Yes, but they are not living up to it anymore.

4) The quality of graduating students will decline.

5) Yes, as long as I get up in time. Ken Clark, Physical Education 2

Tough to say but I think so.
 I don't think I'll feel it.

3) Yes. They should be do more.

4) It will discourage people free going to university. Maybe the what the government wants do.

Valerie Boyce, Rehab Me

l) Probably acceptable but don't know how to compare it anything.

2) Naturally lower it a bit. 1th we can trim somewhere.

3) Yes, they have until now.
4) Poorer quality grads, low

enrolment.
5) I want to but I may have skip a class.

Rob Ashforth, Sci. 2

Acceptable but not great.
 Detrimental.

3) Yes, of course they're living up to it especially w there is so much in the Herit Trust Fund for developing

province.
4) Decline in the number students for the wrong reason Students will learn less and quality of profs will decline, a it isn't way down already.

5) Highly likely. It may not anything but what can you trying?

Frank Zumbo, Bus. 2

 Definitely getting poorer.
 Quality of education will dr It will cause unemployment professors.

3) Yes. Not any more.

4) The quality of business methe province will drop.5) I'll stomp down there.

Roxanne Anderson, Ed

1) I don't know; this is my
year of university.

2) The library cutbacks are good.

3) Yes. They aren't right not 4) Less students will go to unisity but maybe they will be minterested.

5) I don't know. As long as not the only one there.

Rosemary Zak, Home

1) This is only my first year

so it's hard to complain.

2) It is obviously really bad.

3) Yes, but they aren't living to it.

4) The university will put poorer quality grads and reputation will go down. The will be harder for grads to

5) Yes, it's my duty. I disa with tuition increases and backs.

Barbara Askin, Ed l
l) Depends. Only the less im

tant subjects will be hurt.

2) We will have to buy mor our books.

3) No comment.

4) It's going to be #%\$&**!

5) Hopefully yes.

Gov't cuts own throat

by Allen Young

Government policy runs counter to its elaborate ambition of making Alberta an economic, cultural and political center of Canada, said University president Harry Gunning, Saturday.

The university has a duty to be in the forefront and to lead Alberta in its advancement during the important years of development to come, he said at a press conference, part of the Varsity Guest Weekend open house.

He pointed out that because of our hostile climate, our isolation and competition from other large universities, it difficult to replace seniors staff with the best academic considers top quality staff tial to the academic heal university.

Scarce resources i preliminary operating resulting from inade government funding will neven more difficult to he said.

"I was chosen probecause I believe in aca excellence," he said, "an excellence is being eroded

To reach our goals cannot afford to be anythi an outstanding university

SU president Jay Spareproters the inadequate further was resulting in higher (fees for students, and dar university services. This, his why students and staff to protest at the legitomorrow.

He pointed out the ur ty is being forced to a senior positions with sessional lecturers, thus re the quality of instruction a of A.

He said the library hurt by the \$150,000 cut funds outlined in the preli operating budget brough by the Board of Gov March 3.

The freeze on hirin staff until a committee is so review all vacant or v positions will affect the n of courses and will likely n an increased student to ratio, he said.

Spark also said he government was avoiding to face confrontation onth of tuition fees and unifunding.

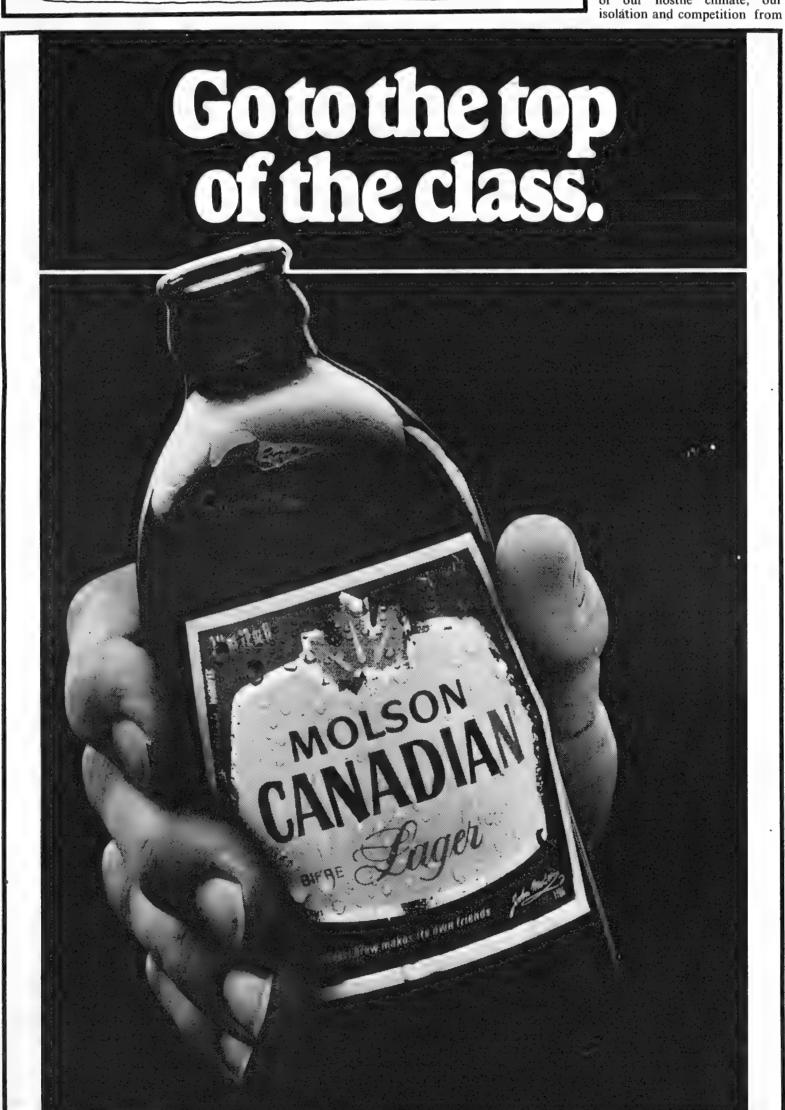

MLA Les Young, reting the government, claim had not seen detailed in tion to allow him to mappraisal of the unividifficulties. He said such mation would be "crucial better understanding of situation."

Young attacked Gur claim that the hostile Edn climate and isolation was ting the University's abilit academic positions, by increased immigration monton. He said the purchas seen a net immigrate between 50 and 60 the people in the past year.

He said the governme to see why the university an operations grant of I cent in excess of last year in view of the fact that a increased salary settleme approximately 6 per cent wages account for 72 per the operations budget, 15.3 per cent needed he

He also indicated the cessive increases in gover spending is inflationary pointed out the universitied demonstrate greater need hospitals and other gover funded institutions if it receive more money.

Immediately after the conference, Dr. Gunning Edmonton Journal reported in not think the rally have an immediate affect government.

resident told to forget march

University president Harry ging will not march with and students tomorrow to st inadequate funding for

le will participate in the rally by addressing the sters before they set out the university and he will to the minister of adeducation at the ature, but he will not ostrate because of direction the Board of Governors (B

At a special meeting of the B yesterday, the board moved to direct the president not staff and students for the mile march to the Alberta ature where they will meet students from other Alberta sities to demonstrate op-

position to inadequate funding of post-secondary education — a policy which has led to increased tuition fees throughout the province and cutbacks in services which has eroded the quality of education at the U of A.

The board also voiced opposition to the mass rally and expressed "concern" for the university's General Faculties Council (GFC) decision to cancel classes and labs for an afternoon to free students for the protest.

"We do not believe public demonstration is the way to change the minds of politicians," said B of G chairman, Eric Geddes.

B of G vice chairman John Schlosser said he felt the participation of the president in the rally would injure the U of A's bargaining position with the

"Legislation cannot be made on the steps of the legislature. The only place to make legislation is on the floor of the legislature," he said.

Schlosser had moved to direct Gunning not to participate. Robert Reynolds seconded it "in the interest of

Dr. Gunning told the board he was torn between his committment to GFC, which had overwhelmingly endorsed the protest by cancelling classes, and his committment to the decision of the B of G.

Staff representative Brian Evans said he supported Gunning's intention to join the march and argued the B of G should not be opposed to the cancellation of classes because the decision had been taken by a representative

University president Harry Gunning

of the entire university.

He added he hoped he would have an opportunity to vote, because the short notice for the meeting had not allowed him time to re-schedule his history class. A class on revolutions, he said ironically.

Jay Spark said he objected directing Gunning not to march because it would detract from the fact that inadequate government funding was a matter which concerned the whole university and not just students.

Graduate Student Association member Jim Talbot pointed out that if Gunning were refused the right to march the principle speak with the minister.

body concerned with the welfare that the march was as much in opposition to cutbacks in educational services as tuition fee increases would be eroded.

Chancellor-elect Jean Forest said she was "disturbed" by Gunning's decision to join the students, but supported his right to make a free choice.

When the vote was taken, the Board was divided, five members in favor and five op-

Chairman Eric Geddes decided in favor of directing the president not to march.

After the meeting, Gunning told reporters he would address the staff and students at the outset of the demonstration and would be at the legislature to

Backbencher answers questions - inadequately

backbencher joined Jay Spark and Harry Gunning to field questions on alleged inadequate funding of the U of A at a press conference, Saturday.

But a cabinet minister -Horst Schmidt of culture, youth and recreation - stayed in an adjacent room, refusing to participate.

The press conference at the U of A faculty club allowed SU president Spark and university president Gunning to reiterate their complaint that the failure of the provincial government to meet the U of A's 1978 operating

grant request will adversely affect the academic health of the day rally. university. The conference was a part of the Varsity Guest Spark said he felt the provincial Weekend open house.

Backbencher Les Young (Lacombe) agreed to publically respond to the complaint, but he

A progressive conservative admitted he was not well briefed on the government's position on university funding.

During the conference Mr. Young was asked why the minister, a member of cabinet with direct input into the decision on university funding, was not present to answer questions since he was attending the open house banquet and seated in the next room.

Mr. Young answered he was representing the government and was able to give a personal assessment of the university funding question.

He said he was hopeful the students and faculty would have a good turnout to the Wednes-

Responding to a question, government was definitely avoiding a face to face confrontation on the issue of tuition fees and university funding.

Gain a professional edge

RIA Management Accountant.

It's a competitive and fast-changing world out there. With professional status as an RIA Management Accountant in addition to your post-secondary education, you'll have an edge in business or government. There's a growing demand for men and women with the professional skills and insights of the RIA Management Accountant. And no wonder. Decisions are more crucial than ever in today's economy. The RIA program can prepare you for a decision-making role. It goes beyond being a thorough study of accounting, computers and data processing. It also includes such areas as report writing, organizational behavior and management processes. You will be a specialist with a broad point of view. Consider the RIA program. With your postsecondary education, you will earn course exemptions allowing you to gain your professional standing in a short period of

PROCTER & GAMBLE

Some cours may not be cancelle

According to comp registered at the Students office, some professors indicated they will not it the General Faculties (GFC) decision to close university and will hold led as scheduled Wednesday

Reports say the profe have told their students they provide detailed informat examinations the day protest.

According to GFC second Margaret McCahand professors have no ri disregard the decision a students are not obligate attend the classes.

There is only the ext of a rehabilitation m clinical course where the sity has special committee meet. The GFC executive mittee moved to sup professor's interpretation GFC motion to cancel and labs not to apply to courses.
